

EDWARDS

MODEL 160 PUMP

FEATURES

The Edwards Series Model 160 Rotary Gear Pump has several unique features that make Edwards Series the right choice for many pumping requirements:

- Rotors synchronized by timing gears – they never touch
- Casing liners
- Shafts are supported on both ends by bearings – not bushings
- Pump drive flexibility – direct drive in most cases
- Bronze construction
- Self priming
- Dry capability running
- Electric, diesel engine or water turbine drive

APPLICATIONS

FIRE PROTECTION

- Fire-fighting foam concentrate pumping
- Water mist pumps
- UL-listed/FM approved or non-listed applications
- Stationary or mobile systems

MODEL 160 PUMP SPECIFICATIONS

Materials of construction	Bronze
Options	Flanged connections, special mounting options
Sealing	Teflon lip seals
Temperature	200°F maximum
Discharge pressures	Up to 300 psig
Ports	2" x 2" NPT (female)
