TRILLIUM PUMP MODEL: AHP

OVERVIEW

Trillium Flow Technologies' updated AHP pump range combines the engineering excellence, innovation, and heritage of our Gabbioneta Pumps® and Termomeccanica Pompe brands. Our expertise in designing and manufacturing BB3 pumps dates back to the 1960s, with thousands of units installed worldwide.

This API-compliant BB3 pump range is axially split, multi-stage, between-bearings, centerline-mounted with either a single or double suction first stage impeller for reduced NPSHr.

KEY FEATURES

Fully API 610 compliant

① Integral case connections to avoid non-destructive testing

② Heavy-duty shaft to minimize rotor deflection and maximize uptime

③ API 682 compliant seal chamber

④ Single or Double suction impeller

⑤ Duty case suitable for 2x API nozzle loads

⑥ Bearing housing leverages common parts across all Trillium Flow Technologies between bearings pumps

⑦ Balance line to ensure both seals remain at equal pressure

⑧ High Pressure center bush and back-to-back arrangement to minimize axial thrust and improve rotor dynamics and MTBF

⑨ Axially split case to allow quick maintenance, inspection, and rotor changes
