Prime should establish almost immediately, with strong water flow. Some installations may require process to be repeated to remove all air from system.

Prime dovrebbe stabilirsi quasi immediatamente, con un forte flusso d'acqua. Alcune installazioni potrebbero richiedere la ripetizione del processo per rimuovere tutta l'aria dal sistema.

L'amorçage devrait s'établir presque immédiatement, avec un fort débit d'eau. Certaines installations peuvent nécessiter la répétition du processus pour éliminer tout l'air du système.

**IMPORTANT:** Decommissioning: turn off the engine; de-pressurise pipework; drain water from drain plug.

**IMPORTANTE:** Messa fuori servizio: spegnere il motore; depressurizzare le tubazioni; scaricare l'acqua dal tappo di scarico.

**IMPORTANT:** Mise hors service: arrêtez le moteur; dépressurisez la tuyauterie; vidangez l'eau à partir du bouchon de vidange.

**ATTENTION:** these original instructions and the accompanying engine manufacturer's instructions must be delivered with the pump to the operator. Pressure up to 108m total head. In certain conditions of operation, the sound level of some models of this pump can exceed 85dB (a) 1 metre. Use handle where appropriate to lift.

**IMPORTANTE:** Queste istruzioni originali e le istruzioni del produttore del motore allegato devono essere consegnate con la pompa all'operatore. Pressione fino a 108 m di prevalenza totale. In alcune condizioni operative, il livello sonoro di alcuni modelli di questa pompa può superare 85 dB (a) 1 metro. Usa la maniglia dove appropriato per sollevare.

**ATTENTION:** ces instructions originales, ainsi celles du fabricant du moteur qui l'accompagne, doivent être livrées avec la pompe à l'utilisateur. Pression jusqu'à 108 m de hauteur totale. Dans certaines conditions de fonctionnement, le niveau sonore de certains modèles de cette pompe peut dépasser 85 dB (a) à 1 mètre. Utilisez la poignée si nécessaire pour soulever.

**IMPORTANT:** this engine driven pump's mechanical seal is designed to pump clean, non-abrasive water with neutral pH. Water temp 1°C – 50°C. **NOTE:** When transporting your Davey Portable Self Priming Pump, water from the casing may leak back past the priming flap. Before attempting to self-prime the pump, you may need to check that the pump casing is full of water. When storing, the pump unit should be drained of water and normal engine storage procedure should be followed. (Run unit until fuel is exhausted, drain and fill sump with fresh oil). The unit should be stored in a dry place. Before starting pump after storage, it should be checked to make sure that it is free to rotate by pulling Engine Starter with ignition off.

**IMPORTANTE:** qia tenuta meccanica della pompa azionata dal motore è progettata per pompare acqua pulita e non abrasiva con pH neutro. Temperatura dell'acqua 1 ° C - 50 ° C. **NOTA:** quando si trasporta la pompa autoadescante portatile Davey, l'acqua dall'involucro potrebbe fuoriuscire oltre l'aletta di adescamento. Prima di tentare di autoadescare la pompa, potrebbe essere necessario controllare che il corpo della pompa sia pieno d'acqua. Durante la conservazione, l'unità pompa deve essere prosciugata d'acqua e deve essere seguita la normale procedura di stoccaggio del motore. (Far funzionare l'unità fino a quando il carburante non è esaurito, scaricare e riempire la coppa con olio nuovo). L'unità deve essere conservata in un luogo asciutto. Prima di avviare la pompa dopo lo stoccaggio, è necessario verificare che sia libera di ruotare tirando il motorino di avviamento con l'accensione spenta.

**IMPORTANT:** le joint mécanique de cette pompe à moteur est conçu pour pomper de l'eau propre, non abrasive et à pH neutre. Température de l'eau 1 ° C - 50 ° C. **REMARQUE:** Lorsque vous transportez votre pompe auto-amorçante portable Davey, il est possible que de l'eau fuie par le volet d'amorçage. Avant de tenter d'auto-amorcer la pompe, vous devez vérifier que le corps de la pompe est rempli d'eau. Lors du stockage, la pompe doit être vidangée d'eau et la procédure de stockage standard du moteur doit être suivie. (Faites fonctionner l'appareil jusqu'à épuisement du carburant, vidangez et remplissez le carter d'huile neuve). L'unité doit être stockée dans un endroit sec. Avant de démarrer la pompe après un période de stockage, assurez-vous qu'elle est libre de tourner en tirant sur le démarreur avec l'allumage coupé.
