MAINTENANCE SERVICE IN OUR WORKSHOP

**WHEN YOU'RE UNDER THE PUMP, WE'VE GOT YOUR BACK.
WE'RE CERTAIN.**

All-Pumps have dedicated workshops to support all types of maintenance overhauls on pumps. Our extensive facilities combined with 50-years' worth of experience enable us to complete pump rebuilds reliably and effectively. We aim to restore the pump to a like-new condition. We pride ourselves on quick turnaround and factory tested repairs to get your facility up and running in the shortest possible time. We are here when you need us.

Our clients find that proper maintenance by a pump specialist leads to reduced disruption, stress, and costs. All pumps sent to us for repair are tested hydrostatically before being returned to your facility.

WHAT WE OFFER:

- Detailed Reports with high-resolution images and suggestions for improvement.
- Troubleshooting for cause of failure
- Upgrading of pump seal materials & design
- Resetting tolerances to factory standards
- Complete Overhaul of all pump parts
- Use of genuine OEM parts
- Replacement of Bearings
- Over 200 Years of Experience in the team
- Factory Acceptance Tests and Reports on all repairs
- Services are backed by a 3-month warranty
- Optional protective coatings
- Laser Alignment / Vibration Analysis

ON-SITE MAINTENANCE

MAINTENANCE PROFESSIONALS GET IN AND ALWAYS GET IT RIGHT

Whether your pump is repaired in our workshop or you request us to come to you, All-Pumps deliver the same quality and excellence that has put us at the pinnacle of the pump service industry. All field services conducted by our specialists are backed by a 3-month workmanship warranty.

“As a general rule, for every dollar spent on preventive maintenance, you will save at least five dollars in subsequent expenses.”

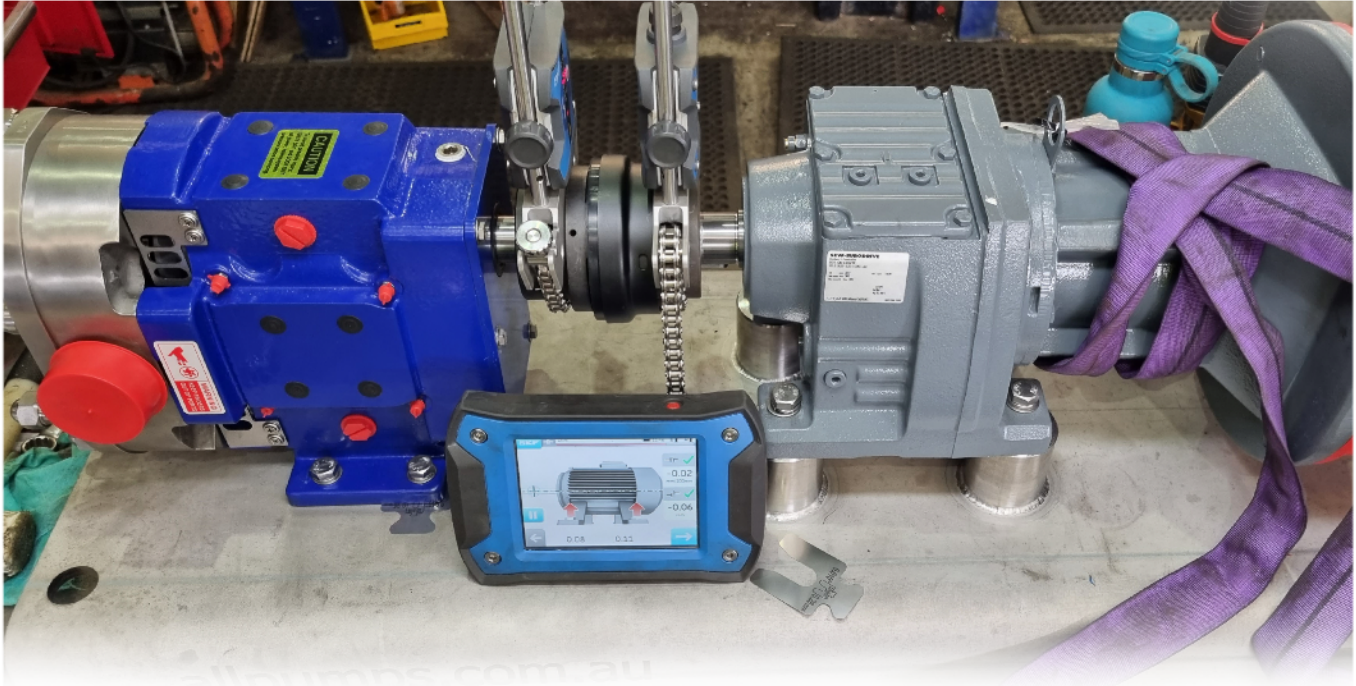

- Kansas State University

OUR ON-SITE SERVICES INCLUDE:

- Replacing mechanical seals
- Pump and Motor/Gearbox Realignment
- Pump Removal and Transport
- Troubleshooting
- Laser Alignment
- Preventive Maintenance
- Cleaning and Urgent Recovery of Equipment
- Vibration Analysis

LASER ALIGNMENT / ANNUAL INSPECTION

Shaft misalignment is responsible for up to 50% of all costs related to rotating machinery breakdowns. Reduce these breakdowns, production losses, high energy consumption, overheating, excessive vibration, and premature wear and tear with our laser alignment services.

REDUCE YOUR OPEX - INSTALL IT RIGHT THE FIRST TIME

All-Pumps have qualified experts well-positioned to perform laser alignment services using the latest SKF shaft alignment tools to achieve the highest accuracy. We also provide a detailed Laser Alignment Report for your reference on the completion.

WE CAN WORK TO FIX:

- Incorrect shaft alignment
- Parallel misalignment (for offset)
- Angular misalignment
- Soft Footing of Base Plates and Old Equipment

NEXUS CONNECT APP

Are you having a hard time identifying and monitoring all the pumps you have on the site?
Or are you sending the wrong people to check on your valuable assets?

All-Pumps Nexus App is the smart solution for identifying and managing assets.

WHY USE THE NEXUS APP

- Remotely register your pumps
- Standardise pumps on the site
- Easy identification of pumps
- Reduce system downtime
- Decrease OHS risks
- Reminders for preventive maintenance

HOW IT WORKS?

- 1) We go to your site
- 2) Tag/Identify every pump
- 3) Tabulate the results on the Nexus App
- 4) When needed, you refer to the app and get in touch
- 5) Manuals and handy parts document will be uploaded to each pump

ON-SITE TROUBLE SHOOTING / PUMP TESTING

All-Pumps has a full fleet of field service equipment and factory-trained professionals to carry out all types of on-site pump services, including pump troubleshooting, and design improvements for all pump brands and types in your facility.

WE GET TO THE BOTTOM OF THINGS

Achieve reliable, sustainable and cost-effective production through our strategic pump troubleshooting and testing services.

HOW IT WORKS

Our team will visit your site, review the pump operating and maintenance history, conduct a walkdown inspection, interview operation and maintenance personnel, and perform required specialised testing to collect data that includes but not limited to:

- Pump capacity
- Total dynamic head
- Pump efficiency
- Net positive suction head
- Temperatures
- Excessive Vibration

ABOUT US

BRINGING 50 YEARS
OF EXCELLENCE
TO YOUR BUSINESS

50
YEARS OF EXPERIENCE

Since 1972, All-Pumps have always been at the forefront of Australia's industrial pump market, custom design, support, and maintenance. We support what we sell, and we will be there when you're under the pump. We're certain. We are the preferred specialist supplier to the industry.

The spirit of urgency has deep roots at All-Pumps. We hold large inventories of spare parts and pumps to get you back up and running in the shortest time possible. We have also invested in our own drivers to make deliveries faster and more reliable. Most importantly, our solution orientated, and motivated team members will follow through until they find something that will work for your application.

Over 50 years of experience we have learnt what's best for almost any application. We strive to bring the market leading, most efficient and reliable products to you from all over the world. With our better range of product, we will offer the best solution for your application.

We believe it's all about experience, whether you are a small or large customer we hold our standards high. Since 1972, we have focused on long term relationships and prioritising our customers needs. For the next 50 years, we will strive to improve with our continuous improvement culture. Our Net Promoter Score is 53% above industry average.
