Water is life

Mr. Ram Ratan Gupta
(04.02.1918 - 14.02.1980)
Founder
Roto Pumps

A genius ahead of his times

Mr. Gupta created history in 1968 by inventing a unique manufacturing process for machining the intricate profile rotor, which is the heart of progressive cavity pump. This technological innovation gave birth to Roto Pumps...

Mr. Gupta strongly believed in "in-house" development of products and manufacturing technology as opposed to importing technology. This philosophy translated into continuous investment in Research and Development as well as in manufacturing infrastructure, enabling Roto Pumps to produce quality products at a competitive cost.

Message from the Chairman

Ours is the journey of an enterprise, which pioneered manufacture of progressive cavity pumps in India in the late 70's to a global player who is now counted amongst the top ten.

Since our inception, we have not only made continuous investments in product development and built a strong manufacturing infrastructure but also focused on developing skills in application engineering, vital to ensure superior performance and customer satisfaction.

The last decade saw Roto Pumps strengthening its overseas presence by setting up regional offices and warehousing facilities in Australia and United Kingdom and additionally, expanding distribution network in other markets.

Our continuous focus on technological upgradation would enable us to continue to offer state-of-the-art products and services with a competitive edge.

Harish Chandra Gupta
Chairman & Managing Director

Infrastructure

Roto Pumps has strong roots in manufacturing engineering and has over the years been able to develop efficient manufacturing processes both in the field of metal cutting and rubber processing. Spread over a combined factory area of 20,000 sq. meters, these units are equipped with sophisticated machine tools like CNC and other SPMs. These are also geared up with modern testing facilities including water and oil test bed with sophisticated data acquisition systems. The continuous investments in, in-house manufacturing facilities for critical components ensure 100% control over quality and customer satisfaction. Roto Pumps manufacturing units are certified for conformance with the ISO 9001-2008 quality surveillance systems, ISO 14001 and OHSAS 18001 (Occupation, Health, Safety & Environment) certifications.

Roto's Manufacturing Plant

Research and Development

Roto Pumps Research and Development facility is the concrete realization of its philosophy of providing cost effective fluid engineering solutions. It translates concepts into prototypes and prototypes into final product. Our Research & Development team was also instrumental in helping the company to get its product accredited to ATEX certification.

This facility is equipped with state-of-the-art testing equipment, a captive machine shop and design centre. The design centre is equipped with 3D designing software such as solid works and also deploys advanced software for flow analysis, mechanical strength and cost optimization. Staffed with highly qualified and experienced professionals, the Roto Pumps R&D centre is playing a critical role in helping the company maintaining its leadership by continuously upgrading the technology as well as expanding the product range.

We strive to be an excellent place to work and to empower our teams to achieve great results for our customers.

Research and Development Centre at Noida

Marketing & Distribution Network

Roto Pumps greatest asset is the application expertise gained over 45 years of providing fluid engineering solutions to thousands of customer worldwide. At Roto Pumps, we believe not in just providing pumps but in providing a complete pumping solution. We have the knowledge and expertise to study your systems, fluids analysis and offer solutions considered through determination of shear rates, viscosities, solid percentages and friction loss calculation.

As a company with global focus, Roto Pumps has presence in over 40 countries through its own network of domestic and overseas branches, distributors and agents. The key objective of these outlets is to provide localized solutions in terms of application engineering, deliveries and sales support.

Product information

As a positive displacement pump manufacturer, Roto Pumps continuously endeavours to increase its product basket to cater to a wider spectrum of industries and applications.

Our product line comprises of Progressive Cavity Pumps and Twin Screw Pumps to meet most varied pumping requirements.

While Progressive Cavity Pumps have applications in fluid metering and pumping of highly viscous, abrasive or sheer sensitive materials, the Twin Screw Pumps are used for clean, lubricating, non-lubricating as well as aggressive liquids.

Roto Extra Value Advantage

Zero Leakage @ low torque

Optimised Rotor Stator Geometry

- Improved Rotor - Stator geometry minimises wear due to lower rubbing velocities as compared to conventional geometry, particularly useful in abrasive applications
- Lower starting torque and effective sealing line (Zero Leakage) improves volumetric efficiency
- Resulting in reduced power consumption and extended service life

Improved Pump Housing

- A sloped housing design reduces entry losses
- Facilitates easy drainage
- Its flexible housing orientation allows the suction port to be rotated in steps of 90° to suit any installation

Tapered Entry Stator

- Facilitates easier entry for fluids
- Improves suction capability

Close Coupled

- Motor lantern designed to accommodate various construction of drives reduces the overall length and leads to ease of maintenance

Smarter Shaft Sealing

- The externally mounted stuffing box enables easier maintenance of Gland Packing or Mechanical seals, without the need to dismantle the bearing housing.

24 MONTHS
WARRANTY

Cardan Universal Joint

- The Cardan type universal joint used in this pump is acknowledged to be far superior to the conventional gear joint, or single pin & bush joint which is subjected to extreme concentrated loads, resulting in high wear rates
- The Cardan type of UJ joint employs two sets of perpendicular pins, each providing freedom of angular movement, which facilitates smoother transmission of angular loads
- The Cardan type UJ joint is also designed to withstand high axial forces which are dominant in Progressive Cavity Pumps

Progressive Cavity Pumps Range

Industrial RD/ RM series

Capacities 250 M³/hr
Pressures upto 48 Bar

These heavy duty pumps are designed for continuous or intermittent duty and are suitable to perform efficiently even for the most difficult fluid handling applications in waste water, chemical and food industries. These pumps are available in bare shaft and close coupled configurations. 6 and 8 stage pumps are also available in select sizes.

Extra Large Capacity RL series

Capacities upto 420 M³/hr
Pressures upto 6 Bar

These Heavy Duty cost effective pumps use the extended Rotor Stator Geometry and low rubbing velocities are ideal for the Sewage & Effluent treatment applications. These Pumps are available in Close Coupled & Bareshaft Configuration.

Wide Throat WM series

Capacities upto 150 M³/hr
Pressures upto 36 Bar

Wide throat type inlet allows gravity flow of highly viscous (Plastico-viscous) material on to Augur-on-Coupling Rod which pushes the substance to the pumping element. Widethroat pumps with bridge breaker arrangement at the top are designed for handling extremely difficult media with very high solid content and non-flowing properties. Available in Close Coupled & Bareshaft Configuration. Custom designed hopper is possible.

Heavy Duty RE series

Capacities upto 100 M³/hr
Pressures upto 48 Bar

These Heavy Duty industrial pumps are compact and are designed for high pressures due to equal wall stators which are capable of generating 12 bar per stage.

Robust and Compact GD series

Capacities upto 15 M³/hr
Pressures upto 12 Bar

These heavy duty agriculture duty pumps are designed to handle the day to day pumping needs like pumping animal effluent, salty water, water containing sand or silt, domestic water supply. With excellent suction lift capabilities. These pumps are available in bare shaft and close coupled configurations.

Wine & Beverage DM series

Capacities upto 86 M³/hr
Pressures upto 24 Bar

These Heavy Duty semi-hygienic pumps are specifically designed for Wine & beverage transfer applications and can also be used for other Food & Beverages applications. Standard connections include IDF, SMS & RJT.

Submerged Vertical VM series

Capacities upto 420 M³/hr
Pressures upto 12 Bar

These vertical pumps are designed to operate with the pumping elements immersed in the product. These pumps are compact and space saving. They are custom designed and manufactured for varying column lengths to suite the sump depth.

Metering Pump RJ series

Capacities between 0.68–500 LPH

Pressures upto 24 Bar

These pumps are developed for low flow applications that demand high accuracies and repeatability. These pumps can handle wide variety of fluids ranging from clean and clear liquids to abrasive, corrosive, viscous and solid laden media. The repeatability accuracy has less than 1% fluctuation. Available in 6 capacities and 3 pressure ranges.

Light Industrial and Agriculture DC series

Capacities upto 8 M³/hr

Pressures upto 3 Bar

The most versatile pump for light industrial, agricultural & domestic applications UV resistant Acetyl-co-polymer housing for pump sizes 11, 12 & 31 Cast Iron casing for pump sizes 41 & 51. Simple and easy to maintain. Compact and light weight. These pumps are available in bare-shaft and close coupled versions. Standard IEC frame sized motors.

Mini Range MC series

Capacities upto 3.5 M³/hr

Pressures upto 3.5 Bar

These pumps are designed for use where low flow or transfer duties in both domestic and industrial applications are required, Excellent suction lifts capabilities up to 8 metres on water. Suitable for a wide range of light industrial applications. Available in close coupled configurations only. Standard IEC frame motors.

General Purpose SC series

Capacities upto 12 M³/hr

Pressures upto 3.5 Bar

These General purpose pumps are compact and light weight, designed for transfer duties in both domestic and industrial applications. Excellent suction lifts up to 8 metres on water. Suitable for a wide range of light industrial applications.

Water and Waste water

Digested Sewage Sludge, Activated Sludge, De-Watered Effluent Sludge, Bio Sludge, Industrial Effluents, Poly Electrolytes, Flocculants, Oily Sludge, Oilwater separation, Lime dosing, Alum Feed, Scum

Sugar

Sulphited Sugar Juice, Masecuite, Magma, Melt, Molasses, Phosphoric acid, Milk of Lime, Flocculant Dosing, Effluent Sludge

Pulp and Paper

Medium and High consistency Pulp, Titanium dioxide, Sodium Silicate, Alum, Latex, Kitchen Coating Slurry, Glue, Black Liquor, Calcium carbonate, Starch slurry, cooked starch, colour, Resin

Detergents Cosmetics & Toiletries

Creams, Shampoo, Heavy liquid emulsion, Lotion concentrate, Selenium liquid, Liquid make up, Tooth paste, Soap solution

Oil and Gas

Drilling mud, Oil sludge, skimming, waste, Skimmer oil from API, Oil & wax mixture, Multiphase fluid transfer, Crude oil & water transfer, Offshore oil transfer, Produced water, Oil Water emulsion, Chemicals

Paint & Varnish

Acrylic solution, Pigment slurry, Varnishes, Resins, Latex, Pigmented paints, Oil paste, Lacquer, Solvents, Paint premix

Food and Pharma

Oil, Cheese, Milk, Yogurt/Curd, Lactose Paste, Cream, Condensed/ Concentrated Milk, Ice-cream, Soy bean concentrate, Taco sauce, Dough, Wheat milk slurry, Yeast, Cake mix, Chocolate, Honey, Syrups, Bulk drug slurries Ointments & Balms, Selenium liquid

Breweries, Wineries & Distilleries

Spent grain & Yeast transfer, Beer & Wine, Decanted settlings, Diamatacious slurry, Fruit bunch with / without stock, Heavy de-juiced red wine mash, Thick mashes, Thick juices & cider, Must, Spent hops, Spent wash, Wet crushed malt

Mining

Coal water mixtures, Clay & Mineral slurries, High pressure wash, Dirty water, Cement grout/Grout mix, Explosive mix transfer & filling, Mortar with fine aggregates, Water spray for dust suppression, Flocculant

Marine

Mud, Brine, Bilge water, Sludge, Sewage, Waste oil

Construction

Wall plastering, Fine aggregate mortar, Sealing compounds, Dispersion plaster, Floor screed, Interior & Exterior plaster, Plaster & Gypsum, Cement & Sand mixture, Cement slurry

Ceramic

Clay coatings, Ceramic slurry, Clay slip, Fire clay suspension, Filter press suspension, Glaze, Iron oxide slip, Kaolin, Slaked lime, Bentonite slurry, Color paste

Agriculture

Pumping Salty water, Effluent field irrigation, Pumping animal effluent, Stock and domestic water supply, Pumping water containing sand or silt, Transfer from dams or creeks, Bio sludge, Animal feed transfer, Surface water transfer for cattle, Preparing & conveying pasty animal feed, Molasses animal feed

Edible Oil

Cooking oil, Soy Bean concentrate, Peanut butter, Refined oil Lecithin, De odorised oil, Oil with wax, Fatty acids, Gums, Acid oil, Soapstock, Crude Palm oil, Bleached palm oil, Mustard oil, Soap Stock

Chemicals

Acetone, Alum, Alumina slurry, Barium carbonate slurry, Benzene & polymer, Boric acid solution, Plutonium oxide, Polyphosphoric acid, Sodium bisulfate, Sodium peroxide, Terephthalic acid, Zinc oxide, Zinc slurry, Zinc & Nickel hydrates

Man made fibre

Viscose, Viscosev flakes, Pulp with Sodium Hydroxide, Fixing Agents, Bleaching Agents, Flocculants, ETP sludge

Twin Screw Range of Pumps

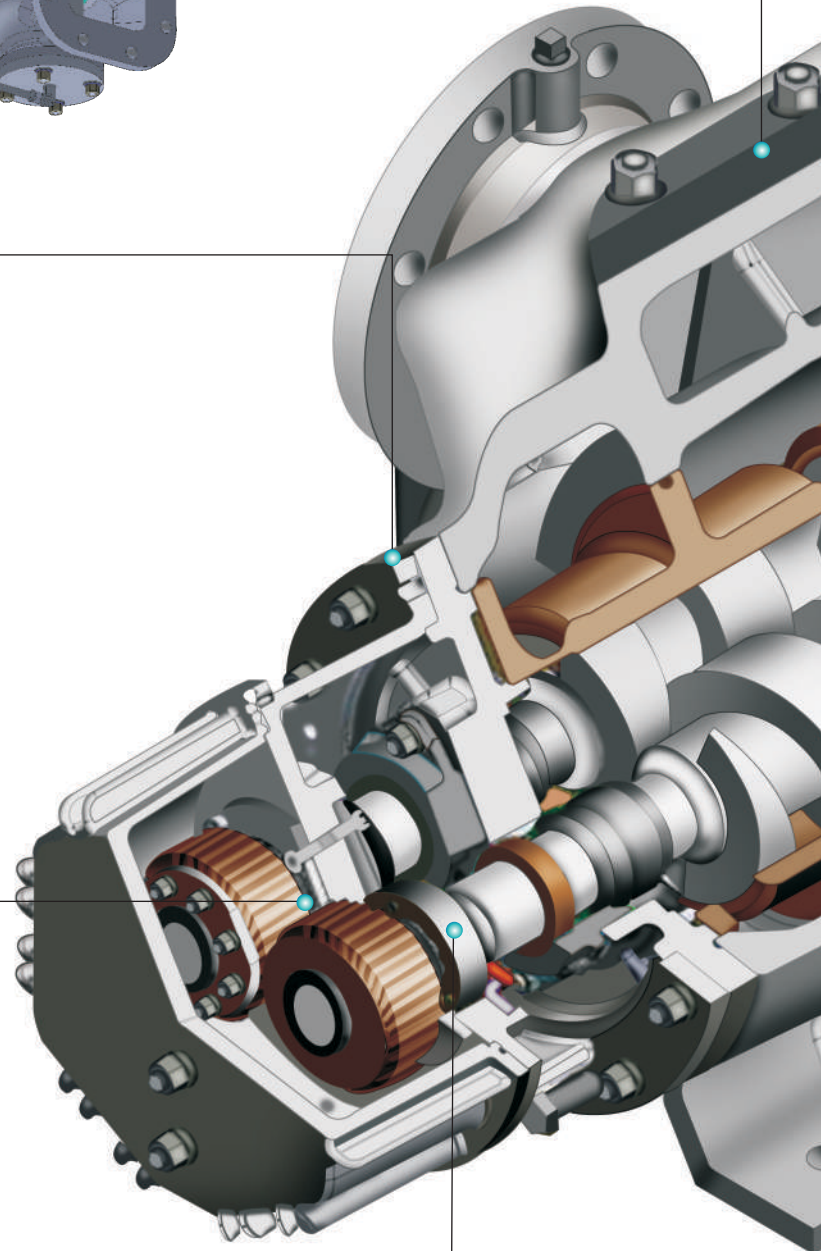

Built in Safety Relief Valve

To prevent the excessive pressure built up in the system, the built in safety relief valve is capable of 100% bypassing of fluid.

Robust Pump Housing

The pump housing are available in casted or fabricated options. The casings are designed to take care of the flange loads. The suction flange and the casing offer minimum resistance to the flow of liquid thus minimising the NPSH requirements within the pump.

Standard Pump casing are foot mounted and non jacketed. Options are available for centre line mounting, sump heated and steam jacketed.

Timing Gear

Timing gear are housed in the gear box. The gear are hardened steel spur gears which are capable of transmitting higher torque and also maintain the clearances between the two screws resulting into longer service life. The gears are oil lubricated and away from the pumping liquid.

Spherical Roller Bearings

Fitted at both the ends, they are well suited for radial and axial loads arising out of Hydraulic pressure. And can also take care of the misalignments arising due to unforeseen working conditions at site.

Shaft Sealing

These pumps can accommodate various types of shaft sealings like soft gland packing, single unbalanced, balanced and double mechanical seals. Options are available for pumps fitted with mechanical seals conforming to API 682 standards and various flushing and quenching plans.

Replaceable Liner

Renewable liners are standard feature. They extend the service life of the pumps and also minimise the maintenance cost over a long period.

Screw Profiles

Unique double profile of the screw flanks delivers a higher efficiency. The screw flanks are integral with the shaft. Various pitch sizes are available to offer optimised flow rates with high volumetric and mechanical efficiencies. These screws are also suitable for high pressure applications.

Horizontal External Bearing RE series

Capacities upto 500 M³/hr

Pressures upto 40Bar

Due to its external bearing mounted design, the product does not come in contact with the bearings and ensures long service life even with the corrosive or abrasive nature fluids. These pumps can handle fluids with high temperatures upto 350° C / 660° F. API 682 type seals can be mounted. Built in safety relief valve designed for 100% bypass.

Horizontal Internal Bearing RE series

Capacities upto 500 M³/hr

Pressures upto 40Bar

These pumps are designed for clean and lubricating media. The pumps are fitted with the bearings inside and the bearings are lubricated with the pumping media itself. Available in standard foot mounted configuration with sump heating arrangement as an option. Built in safety relief valve designed for 100% bypass.

Vertical Internal / External Bearing RV series

Capacities upto 500 M³/hr

Pressures upto 40Bar

These pumps are designed to suite the areas where space is a constraint. They are available in internal as well as external bearing configurations. These pumps can handle fluids with high temperatures upto 350° C / 660° F with or without steam jacketing, electrical/steam tracing arrangement as an option. API 682 type seals can be mounted. Built in safety relief valve designed for 100% bypass.

Applications

Oil and Gas production and processing

Crude oil, Naptha, Vaccum residue , LFO, Fuel oil , LDO, LSHS, HSD, Turbine oil , Furnace oil ,Lubricating oil, Bitumen, RFO

Power Plant

Fuel oil, LDO, LSHS, HSD, Turbine oil, Furnace oil, Lubricating oil, RFO

Marine and Ship Building

Fuel oil, Striping duty, Bitumen, Pitch, Molasses, Glycol, Vegetable oils, Chemicals, Main Engine Lube oil, HFO transfer, Hydraulic oil, Marine Diesel oil

Man Made Fibre

Viscose, Viscose Flakes , Pulp with NaOH , Bleaching Agents , Polymeric Resin

Steel

Fuel oil , LDO, LSHS, HSD, Turbine oil , Furnace oil, Lubricating oil, RFO, Tar

Paper

Fuel oil , LDO, LSHS, HSD, Turbine oil , Furnace oil, Lubricating oil, Black Liquor, Pine oil

Sugar

Fuel oil , LDO, LSHS, HSD, Turbine oil , Furnace oil, Lubricating oil, Molasses

Fertilizer

Fuel oil, LDO, LSHS, HSD, Turbine oil , Furnace oil, Lubricating oil

Edible Oil

Cooking oil, Soy Bean concentrate, Refined oil, Lecithin, De odorised oil, Oil with wax, Fatty acids , Crude Palm oil , Bleached Palm oil, Mustard oil, Soap Stock

Roto@work

Retrofit Parts for Progressive Cavity Pumps

Roto Pumps is one of the world's leading manufacturer of Progressive Cavity Pumps. Its experience spans over 45 years in designing, manufacturing and supplying Progressive Cavity Pumps. At Roto it is not simple re-engineering but intelligent engineering. No wonder, more and more customers are finding Roto's progressive parts outperforming the originals.

Progressive Spares for

These are registered trade mark of Seepex/Mono/Moyno etc.

Material Options

Rotor	Stainless Steel, Tool Steel and Exotic Alloys
Stator	Natural, Nitrile, Food Grade White Nitrile, HNBR, EPDM, Chloro-Sulphonated Elastomer, Fluoroelastomer and AFLAS®
Other Parts	Stainless Steel, Tool Steel and Exotic Alloys

Coating Options

Hard Chrome Plating, Rotochrome and Other Special Hard Coatings

Netzsch®, Monoflo®, Seepex®, Moyno® & Allweiler® are registered trademarks of Netzsch Mohnopumpen GmbH, Mono Pumps Ltd., Seeberger GmbH + CoKG, Robbins & Myers, Inc. & Allweiler AG respectively. AFLAS® is a registered product of Asahi Glass Co. Ltd., Japan.

Roto Pumps is not an authorised distributor of parts or services for Netzsch Mohnopumpen GmbH's, Monoflo, Seeberger GmbH's, Robbins & Myer's Inc. and Allweiler AG's products. Roto Pumps Ltd. products are not associated with, endorsed by, or sponsored by these companies.
