# SUBMERSIBLE SEWAGE PUMPS

#### Robust Design, Real Quality

Designed for excellent performance, low energy consumption, and easy maintenance, PRORIL submersible sewage pumps serve a wide range of sewage transport applications. They are ideal for residential, commercial, industrial sewage transferring, wastewater treatment plant, site drainage, etc.

## **SEWAGE PUMPS**

#### **COMMON FEATURES**

#### Watertight Cable Entry

The cable entry employs an anti-wicking block where each conductor is stripped and encapsulated in epoxy. This feature effectively prevents water from penetrating the motor chamber when the cable end is submerged or the cable sheath is damaged.

#### 2 Motor Protector

The motor incorporates a motor protection device which protects against overheating and dry-run. Pumps with a capacitor-run or direct-on line starting

motor are equipped with a circle thermal protector. Pumps with a start-delta starting motor are equipped with miniature thermal protectors in each phase.

#### **3** Submersible Motor

Air filled motor, housed in a watertight casing, conforms to Class F insulation.

#### 4 C3 Ball Bearings and Hardened SS Shaft

High quality of C3 ball bearings and the well-balanced, hardened stainless steel shaft enhance stability during continuous pumping operations. The above images are for illustration purposes only, please refer to datasheets for more details.

#### **5** Double Mechanical Seals

Located in the oil chamber, the device is made of quality materials with highly wear-resistant silicon carbide in lower side that provides extra protection against leakage and dry-run.

#### 6 Rugged Cast Iron Design

The whole cast iron pump features a simple, robust structure that provides durability and impact resistance to rough conditions.

#### 7 Food Grade Lubricant

PRORIL adopts eco-friendly lubricant to minimize environmental impacts.

#### 8 Impellers and Volutes

Types of impellers and volutes are varied with pump models, cultivated through years of experience in the pump manufacturing industry. They include singe channel impellers, vortex impellers, semi-open impellers, grinders, and agitators.

### **GOCUT SERIES** CUTTER PUMPS

Discharge Bore : 50 - 100 mm Motor : 0.75 ~ 3.7 kW, 2-Pole Motor Impeller Type : Semi-Open Channel Cutter impeller Features : Utilizing a cutter mechanism and tungsten carbide alloy to cut fibrous matters and to prevent clogging.

#### **GOFLOW SERIES** NON-CLOG PUMPS

Discharge Bore : 50 - 100 mm Motor : 0.75 ~ 3.7 kW, 2-Pole Motor Impeller Type : Semi-Open Channel impeller Features : Wide channel allows solids passing with minimal blockage.

#### **GOSPIN SERIES** DRAINAGE PUMPS

Discharge Bore : 50 - 100 mm Motor : 0.4 ~ 3.7 kW, 2-Pole Motor Impeller Type : Semi-Open impeller Features : Offering high performance in various effluent pumping applications.

#### **GOBITS SERIES** GRINDER PUMPS

Discharge Bore : 32 - 50 mm Motor : 1.1 ~ 5.5 kW, 2-Pole Motor Impeller Type : Vortex impeller Features : Employing a grinding mechanism to prevent clogging, especially ideal for narrow sewer.

#### GOMAX SERIES SINGLE CHANNEL PUMPS

Discharge Bore : 80 - 150 mm Motor : 3.7 ~ 22 kW, 4-Pole Motor Impeller Type : Single Channel impeller Features : Passing 76mm diameter solids without clogging.

#### GOVOX SERIES VORTEX PUMPS

Discharge Bore : 50 - 100 mm Motor : 0.4 ~ 7.5 kW, 2-Pole Motor Impeller Type : Vortex impeller Features : A whirling action enables large solids and fibrous matters to be pumped out without obstruction.

#### **GOVOX-S SERIES** VORTEX & AGITATOR PUMPS

Discharge Bore : 80 mm Motor : 2.2 ~ 3.7 kW, 2-Pole Motor Impeller Type : Vortex impeller Features : Coupled with an agitator, which significantly and efficiently improves solids handling.

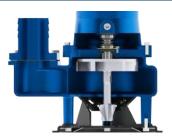

# **GOCUT SERIES**

#### **CUTTER PUMPS**

- GOCUT Series pumps are designed for handling raw sewages and various wastewater treatments.
- The cutting mechanism shreds fibrous materials into small pieces to prevent from clogging that would happen on a common pump.
- The cutting mechanism consists of a chopper plate and a tungsten carbide alloy tipped onto each vane of the semi-open channel impeller.
- Guide rail fittings are available on request.

# **GOFLOW SERIES**

#### **NON-CLOG PUMPS**

- GOFLOW series pumps are the basic sewage pumps that can handle solids up to 37 mm in diameter without clogging.
- GOFLOW series pumps are equipped with a semi-open channel impeller, a wide channel for the pump to pass solids from inflow to discharge with minimal blockage.
- Guide rail fittings are available on request.

## **GOBITS SERIES**

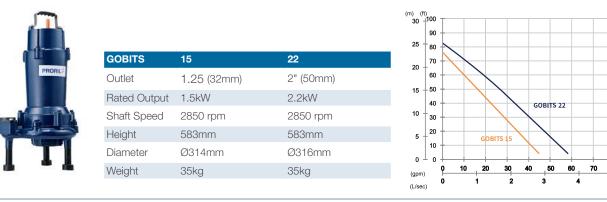

#### **GRINDER PUMPS**

- Designed for high head, GOBITS series pumps effectively grind and transfer solids under high pressure from one place to a higher place or distant place.
- GOBITS series pumps employ a grinding mechanism in the suction inlet to grind fibers, plastic bags, rubber goods, garbage, etc. into small particles before discharging the waste.
- The grinding devices are made of high chrome steel, with the hardness of HRC 55, achieving excellent wear resistance.
- Guide rail fittings are available on request.

## **GOMAX SERIES**

#### SINGLE CHANNEL PUMPS

- Designed for passing 76mm diameter solids without clogging, GOMAX series employ a single-channel enclosed impeller to efficiently and reliably transfer raw sewage.
- GOMAX series featured high efficiency, non-clogging, long life, and energy saving.
- The design of air release valve in pump casing prevents air lock.
- GOMAX series are suitable for commercial and industrial wastewater applications.
- Guide rail fittings are available on request.

## GOVOX SERIES VORTEX SEWAGE PUMPS

- GOVOX series features its vortex impeller coupled with a wide pump casing. The rotation of the impeller produces a whirling, centrifugal action between the impeller and pump casing. The action enables large solids and fibrous matters to be pumped out without obstruction, leading to less impeller wear and longer pump life.
- Guide rail fittings are available on request.

### **GOVOX-S SERIES** VORTEX & AGITATOR PUMPS

- GOVOX-S series pumps are equipped with an agitator, which forcibly agitates the fluid for easy and efficient transmission of sludge, sand, mud, and debris.
- The agitator prevents air lock that tends to take place on vortex pumps.

# **GUIDE RAIL FITTING SYSTEMS**

The guide rail fitting system connects the pump to and from the piping simply just by lowering and elevating the pump. The mechanism allows easy maintenance and inspection without the need to enter the sump.

Pump models used in combination with the guide rail fitting system can be identified by the following index and reference.

Guide Rail Type	Applicable Models

#### PRORIL

PRORIL was established in 1979, starting from a small motor factory where it has transformed itself into a global size submersible pump manufacturer. Its perseverance and dedication of making high quality products and maintaining a strong working etiquette are mere images of the founder's belief and philosophy that contribute to the success of PRORIL.

With decades of experiences, PRORIL specializes in submersible pump manufacturing service, and continues investing in the fluid dynamics design, motor efficiency enhancement, and R&D of various metal alloys. The integration of upstream and downstream suppliers has completed the manufacturing chain that PRORIL proudly offers to its customers. PRORIL goes through stringent quality procedures where its quality management system conforms to the global standards.

Up to now, PRORIL had recognized by various international awards by the persistence of product quality and continuous improvement according to market demand. Through the recognition of the awards, PRORIL is more determined to provide better services and products to customers.

Today, PRORIL has developed a complete product line that covers dewatering pumps, sewage pumps, slurry pumps, and others. They are applicable in general drainage, construction, industrial sites, wastewater treatment, sludge removal, and so on.

Furthermore, PRORIL's professional R&D team continuously improves the product performance to meet various needs in tough dewatering applications.

The success of PRORIL has been based on unyielding commitment and attitude to technical excellence and unparalleled dedication to customer service. Honesty and integrity have further contributed to a worldwide collaboration and connection to a long-term sustainable relationship with all our customers. In future, PRORIL will continue to excel and serve every PRORIL's customer with our professionalism, enthusiasm, and trust.
